### List of Tables

1. Breeding lines and varieties evaluated in 2005 ................................................................. 1
2. Precipitation (inches) at each of the five test sites during 2005 .................................................. 2
3. Cooperators, soil types, and planting, digging, and combining dates for 2005 ......................... 5
4. Cultural practices used in Martin County, North Carolina – 2005 ........................................... 6
5. Cultural practices used in Columbus County, North Carolina – 2005 ................................. 7
6. Cultural practices used in Southampton County, Virginia – 2005 ......................................... 8
7. Cultural practices used in Suffolk, Virginia – 2005 ............................................................... 9
8. Cultural practices used in Sampson County, North Carolina – 2005 ................................. 10
9. Plant growth habit (GH) and plant height (inches) – 2005 ...................................................... 11
10. Disease ratings at North Carolina and Virginia locations – 2005 ........................................ 13
11. Percentage of jumbo and fancy pods based on farmers’ stock grades, Dig I – 2005 .......... 15
12. Percentage of jumbo and fancy pods based on farmers’ stock grades, Dig II – 2005 ......... 17
13. Pod brightness measurement (Hunter L Score) for Columbus County and Sampson County, North Carolina, and the City of Suffolk, Virginia, averaged across locations, Dig I – 2005 . . 19
14. Pod brightness measurement (Hunter L Score), Dig II – 2005 ........................................... 21
15. Grade characteristics, yield, and value of lines in Martin County, North Carolina, Dig I – 2005 ................................................................. 23
16. Grade characteristics, yield, and value of lines in Martin County, North Carolina, Dig II – 2005 ................................................................. 25
17. Grade characteristics, yield, and value of lines in Columbus County, North Carolina, Dig I – 2005 ................................................................. 27
18. Grade characteristics, yield, and value of lines in Columbus County, North Carolina, Dig II – 2005 ................................................................. 29
19. Grade characteristics, yield, and value of lines in Southampton County, Virginia, Dig I – 2005 ................................................................. 31
20. Grade characteristics, yield, and value of lines in Southampton County, Virginia, Dig II – 2005 ................................................................. 33
21. Grade characteristics, yield, and value of lines in the City of Suffolk, Virginia, Dig I – 2005 ................................................................. 35
22. Grade characteristics, yield, and value of lines in the City of Suffolk, Virginia, Dig II – 2005 ................................................................. 37
23. Grade characteristics, yield, and value of lines in Sampson County, North Carolina, Dig I – 2005 ................................................................. 39
24. Grade characteristics, yield, and value of lines in Sampson County, North Carolina, Dig II – 2005 ................................................................. 41
25. Grade characteristics, yield, and value of lines averaged across all locations, Dig I – 2005 ................................................................. 43
26. Grade characteristics, yield, and value of lines averaged across all locations, Dig II – 2005 ................................................................. 45
27. Ranked value ($/A) by variety or line and location, Dig I – 2005 ............................................... 47
28. Ranked value ($/A) by variety or line and location, Dig II – 2005 ........................................... 49
29. Grade characteristics, yield, and value of lines in Martin County, North Carolina, Dig I – two-year averages 2004-2005 ................................................................. 51
30. Grade characteristics, yield, and value of lines in Martin County, North Carolina, Dig II – two-year averages 2004-2005 ................................................................. 53
31. Grade characteristics, yield, and value of lines in Columbus County, North Carolina, Dig I – two-year averages 2004-2005 ................................................................. 55
32. Grade characteristics, yield, and value of lines in Columbus County, North Carolina, Dig II – two-year averages 2004-2005 ................................................................. 57
33. Grade characteristics, yield, and value of lines in Southampton County, Virginia, Dig I – two-year averages 2004-2005 ................................................................. 59
34. Grade characteristics, yield, and value of lines in Southampton County, Virginia, Dig II - two-year averages 2004-2005 ................................................................. 61
35. Grade characteristics, yield, and value of lines in the City of Suffolk, Virginia, Dig I - two-year averages 2004-2005 ................................................................. 63
