FLUE-CURED TOBACCO BUDGET INFORMATION
Eric Eberly, Retired Extension Agent, Farm Business Management

Introduction
The flue-cured tobacco budget is an estimate of the costs to produce 2500 pounds of marketable tobacco. Expense values used in the budget are based upon projected input prices and recommended production practices. Every producer is encouraged to adjust this budget using the right hand column to reflect production practices and prices that are relevant to their own farming operation. This column is your estimated cost of production.

Budget Assumptions
1. The average price received is not being calculated or estimated. However, break-even prices to cover cost variable and fixed costs are calculated based on 2500 pounds of cured leaf harvested per acre.

2. The short term energy outlook published monthly by the Energy Information Administration http://www.eia.doe.gov/emeu/steo/pub/contents.html has estimated average prices of fuels for 2011. The price of fuels used in the budget reflects this estimation which is below the highs in 2008 but above current farm delivered prices.

3. Since the AWER wage calculation method is being litigated, the AWER wage for 2011 is uncertain. Labor cost is estimated to be $12.13 per hour. It includes an unpublished adverse wage of $9.24 and indirect labor cost of $2.89 per hour. The indirect labor cost per hour is calculated by dividing total direct labor costs of $14,462 (association fees, visas, transportation, housing, insurance, et.) by 5000 hours of labor (50 acres x 100 hours).

4. Crop insurance cost of $124.59 per acre was calculated by dividing the total unsubsidized premiums payable by total Virginia acreage insured in 2010.

Budget Interpretation
Income and expense items for the 2011 budget are broken down into four separate sections: Gross Receipts, Pre-harvest Variable Costs, Harvest Variable Costs, and Fixed Costs. Explanations of the items that fall into each section and the economic returns that can be calculated are detailed below

• Gross Receipts represents per acre cash income to the tobacco operation. Gross receipts are calculated by multiplying the average yield per acre by the average gross contract price per pound. Four different leaf separations with a contract price can be entered into an
Excel spreadsheet referenced at the end of this section.

- Pre-harvest costs are typically cash expenses that must be paid annually to produce a crop of tobacco prior to harvest. Examples of pre-harvest variable costs include plants, fertilizer, chemicals, machinery fuel and repairs and hired labor.

- Harvest costs are cash expenses getting the tobacco from the field to the buying station. Examples of harvest costs include harvest labor, curing fuel and electricity.

- Total Variable Costs is the sum of pre-harvest and harvest variable costs. Variable costs are often called “cash costs” or “out-of-pocket expenses”.

- Return over variable costs is simply the gross receipts of the crop minus the total variable costs. This value can essentially be viewed as the return over “cash costs” or the return over “out-of-pocket expenses”.

- Fixed Costs are the expenses that result from the ownership of a fixed input. Examples of fixed costs include depreciation, property taxes, and insurance on the barns and machinery. A land charge has been excluded from this calculation.

- The return to land, risk, and management is calculated by subtracting the total variable costs and the fixed expenses from Gross Receipts. This represents the return to the operator’s land (the equivalent of an annual land charge or rental value), time (unpaid operator/family labor), and management skills employed in producing a crop.
### FLUE-CURED TOBACCO – Contract, Irrigated

**ESTIMATED COSTS AND RETURNS PER ACRE**

| Acres | 2500 POUND YIELD |

#### 1. GROSS RECEIPTS

<table>
<thead>
<tr>

- **Stalk Position Lbs**

**TOTAL RECEIPTS:** Lbs $0.00

#### 2. PRE-HARVEST VARIABLE COSTS

**TOBACCO PLANTS -**

- **Flue-cured**
- **Cover Crop: Rye**
- **Lime (Prorated)**
- **FRow: Fertilizer (6-12-18)**
- **Sidedress: (13-0-14)**
- **Herbicides**
- **Insecticides**
- **Fungicides**
- **Nematicides**
- **Sucker Control**
- **Federal Crop & Hail Insurance APH**
- **Land Rent**
- **Tractor Equip: Fuel & Oil**
- **Tractor & Equip.: Repairs**
- **Tractor & Equip.: Labor**
- **Hand Production Labor**
- **Production Interest**

**TOTAL PRE-HARVEST COSTS:** $0.83 Per Pound $2,081.39

#### 3. HARVEST VARIABLE COSTS

- **Tractor Equip: Fuel & Oil**
- **Tractor & Equip.: Repairs**
- **Tractor & Equip.: Labor**
- **Hand Harvest Labor**
- **Curing Fuel (LP)**
- **Building Ins. & Electricity**
- **Supplies**

**TOTAL HARVEST COSTS:** $0.65 Per Pound $1,626.76

#### 4. TOTAL VARIABLE COSTS

- **Breakeven Yield**
- **Breakeven Price**

**# Pounds** $1.48 Per Pound $3,708.15

#### 5. RETURN OVER TOTAL VARIABLE COST $0.00

#### 6. MACHINERY FIXED COSTS (BASED ON NEW EQUIPMENT COST)

- **ACRE** $771.89 $771.89

#### 7. OTHER FIXED COSTS

- **DOL** $3,708.15 8.0% $296.65

#### 8. TOTAL FIXED COSTS

- **$0.43 Per Pound $1,068.54

#### 9. TOTAL VARIABLE & FIXED COSTS

- **$1.91 Per Pound $4,776.69

#### 10. PROJECTED NET RETURNS TO LAND, RISK AND MANAGEMENT: $0.00

*PLEASE NOTE: THIS BUDGET IS FOR PLANNING PURPOSES ONLY.*
* Fertilizer requirements will vary with application method, and/or residual nutrient levels in the soil.

Profit Analysis

Based upon budget projections, the “Total Variable Costs or Cash Costs” of production for the 2011 crop are estimated at $3,708.18 per acre or $1.48 a pound. The breakdown of variable costs is displayed in Figure 1. Fixed Costs were estimated at $1068.54 an acre or $0.43 a pound. Farmers must be able to cover fixed costs in the long run for the farm business to be sustainable.

The price needed to cover total cost with varying yields is in the following table. It also calculates additional prices needed to generate varying profit levels that can pay for family living expenses.
Since yield and average sale price will vary from farm to farm each year, calculated returns over variable costs with varying yield and price levels are displayed in the following table.

### AVERAGE PRICE ($/lb.) NEEDED TO COVER TOTAL COSTS (VARIABLE AND FIXED)\(^1\)

<table>
<thead>
<tr>
